*Are you looking for a possibility to observe your storage capacities continuously?
Do you want to detect the waste of valuable space more easily?
Try our SQL-based disk space manager SpaceObServer now!
A background service scans your file system for allocated space and stores the results in a SQL database.
An Explorer-like user interface offers easy access to the stored scan results. Various kinds of reports
and searches can so be generated without noticeable delays. These features make SpaceObServer a
powerful tool in your daily struggle against the waste of hard disk space.
Please find more information at: <http://www.jam-software.com/spaceobserver/>*

L I C E N S E A G R E E M E N T

Please read the following terms and conditions carefully before installing and using the software. Your usage of our software indicates your acceptance of this license agreement and warranty.

Registered Version

Terms of Use

One registered copy of our software may either be used by a single person who uses the software personally on up to three computers, or it may be installed on a single workstation used non-simultaneously by multiple people, but not both.

You may access the registered version of our software through a network, assumed that you have obtained individual licenses for the software covering all workstations or terminal clients that will be able to access the software through the network. For instance, if 8 different workstations or terminal clients are able to access our software on the network, each workstation will need to have its own license, regardless of whether they use our software at different times or concurrently.

There are multi user licenses of the software available which makes licenses much cheaper compared to individual licenses. A multi user license pack may be used at one location and by one company (legal entity) only, it cannot be split between several locations and it cannot be used by parent or subsidiary companies.

A site-license allows you to use our software on all personal computers of one location (city) of a company. For instance, if your company has a branch in Los Angeles and bought a site license, the software may be installed on all personal computers there. For the personal computers in New York you need additional licenses. A countrywide license allows our software to be installed on all PCs and servers of your company in one country, a worldwide license allows our software to be installed on all PCs and servers of your company worldwide. Again, this does not include parent or subsidiary companies.

Updates

Updates are free within 12 months after purchase. You are allowed to use the software as long as you want to. If your maintenance expires you will receive no more free updates but you will be able to purchase a renewal for a reduced price in our customer's area.

Disclaimer of Warranty

THIS SOFTWARE AND THE ACCOMPANYING FILES ARE SOLD "AS IS" AND WITHOUT WARRANTIES AS TO PERFORMANCE OR MERCHANTABILITY OR ANY OTHER WARRANTIES WHETHER EXPRESSED OR IMPLIED. Because of the various hardware and software environments in which this software may be used, NO WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE IS OFFERED.

Good data processing procedure dictates that any program should be thoroughly tested with non-critical data before relying on it. The user must assume the entire risk of using the program. ANY LIABILITY OF THE SELLER WILL BE LIMITED EXCLUSIVELY TO PRODUCT REPLACEMENT OR REFUND OF PURCHASE PRICE.

Distribution of the Software

The distribution of the full version to third parties is prohibited in any form, including selling, renting and loan, without prior authorization by JAM Software. All distribution rights remain with the author. A non-authorized distribution of the software is an illegal act.

Licensed developer components may be distributed freely with the projects of those customers who have a license, as long as they distribute them in binary form and without the license file. In this case the number of licenses that is needed must be greater or equal to the number of users that are using the components for development.
